2015 Activities

- ◆ **Fill open committee memberships - *Passionate* volunteers ONLY!!**
 - **Need representation from Pipeline Operators and Service Providers
(Contractors/Inspection/Manufacturers)**
 - **Seeking horsepower!! - Individuals with commitment and tenacity to see projects/initiatives through completion.**
- ◆ **Complete three additional safety guidelines:**
 - **Safety Communications**
 - **Vehicle/Driving Safety (Distracted driving, etc.)**
 - **Pipe Loading and Unloading Best Practices**

2015 Activities Cont.

- ◆ ***Continue close association with INGAA EH&S Committee activities—Kim Jackson***
- ◆ ***In lieu of completing a safety culture survey for the Foundation, we want to increase the support of the (Big) INGAA workshops***
- ◆ ***Continue to generate active engagement from Foundation Members to enhance Pipeline Safety Culture***
- ◆ ***Safety Statistical Survey to be completed in 2015 for previous three years of performance (2012, 2013, 2014)***

“Free” Safety Lessons for the Pipeline Industry

SAFETY LESSONS FOR THE PIPELINE INDUSTRY

What is it?

The Lessons Learned Repository is an anonymous database created by INGAA Foundation members in 2012 to share lessons learned and best practices in an effort to improve safety across the industry.

What are the Goals?

The Lessons Learned Repository is an important tool in our industry's quest to continuously improve both pipeline and worker safety. But to reach our safety goals, we need your participation!

Goal: Improved safety performance across the industry resulting from the sharing of safety-related information, whether that lessons follows an accident, a near miss or a success story.

Goal: Hold an annual workshop to highlight the lessons learned and create a forum for discussion.

Why You Should Use the Repository:

1. Learn from others about potential hazards that could impact your company:
 - a. Easily incorporate ready-made safety topics into JSAs, tailgate sessions and other safety moment opportunities.
2. Prevent similar damage and injury by participating and sharing your safety-related incidents.
 - a. Help improve our industry's safety performance.
3. It's easy to contribute a Lessons Learned:
 - a. Complete a simple online form to report your work-related incident.

“Thank You” to the Lessons Learned Repository Submitters!
